1er Congres International de Fasciatherapie

12:00 AM - 12:00 AM CET

The aim of this congress is to bring together international stakeholders (practitioners, researchers, schools, associations) who disseminate fasciatherapy throughout the world (France, Brazil, Switzerland, Belgium, Canada, Romania, etc.) in order to take stock of the latest scientific news on fascia and fasciatherapy.

The program is organized around three themes:

*Science: Taking stock of the paradigm and research on fasciatherapy
practice: communicating and sharing expertise and/or research on fasciatherapy
and professionalization: reflecting on the future of fasciatherapy in the world, taking into account developments in the health system*

The two days will include oral communications with invited speakers, open oral sessions for experts and research on fasciatherapy and practical workshops.
